

MARA-2 monitoring device

Monitoring device MARA-2

MARA-02 - Equipment for automatic monitoring of gas wells

Parts of the MARA-02:

- Rm1 switchboard
- 2x solar panel
- Flange cover DN 100
- Anemometer AN-01
- Methane sensor Ir24

Advantages:

- ✓ Automatic device
- ✓ Daily power supply with 2 solar panels
- ✓ GPRS communication
- ✓ Signaling of switchboard opening

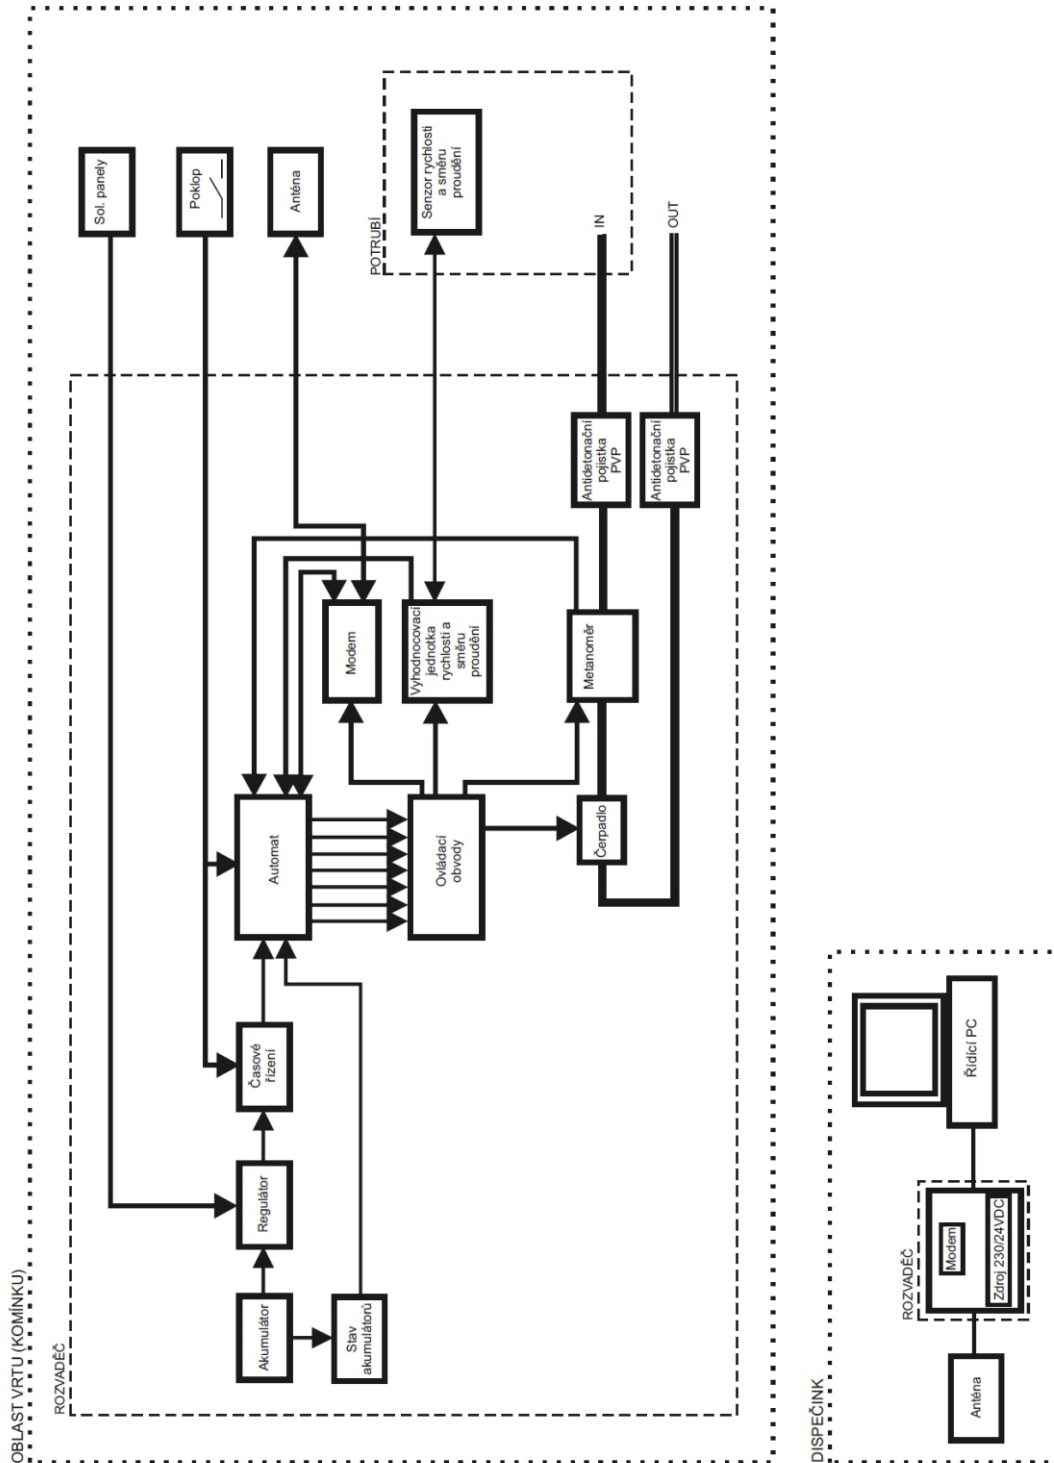

MARA-02 is used for automatic monitoring of ventilation deep wells. The methane concentration (Ch₄), velocity and flow direction are monitored on the given well.

The MARA-2 device is equipped with an methane sensor IR24 and a flow velocity sensor AN-01

Important note: Technical parameters of the MARA-02 may be changed. Please contact us for further technical advice and tailor-made solutions.
