

Calibration kit SC-SET-CH4

SC-SET-CH4

Calibration kit for
gas sensor SC-SET-CH4

Sada obsahuje:

- 1x Synthetic air cylinder 1l
- 1x Pressure bottle 2.2% Ch4 1l
- 1x Calibration attachment SC-KAL
- 1x TYGON hose 3m \varnothing 8 / 10mm

Advantages

- ✓ Easy operation
- ✓ Low weight
- ✓ Variant - antistatic plastic case
- ✓ Variant - Leather bag

The SC-SET-CH4 calibration kit is used to calibrate and verify methane sensors SC-CH4, SC-CH4-TM and others. The set consists of two gas cylinders, a calibration attachment and a hose.

The first bottle contains synthetic air and is used to set the "zero" of the gas sensor. The second bottle contains methane with a volume concentration of 2.2% in synthetic air and is used to adjust the "gain" of the gas sensor.

Important Note: The specifications of the SC-SET-CH4 can be modified. Contact us for further technical advice and tailor-made solutions.
