

Anemometer SC-UAN-01

Anemometer SC-UAN-01

**Anemometer SC-UAN-01
for mines and surfaces**

Advantages:

- ✓ Automatic device
- ✓ High measurement accuracy
- ✓ Long-term reliability and durability
- ✓ Variable device connectivity
- ✓ Archiving and viewing of measured data in SW SCADA
- ✓ ATEX certification

The SC-UAN-01 device is designed for continuous measurement of air velocity in various environments, both without danger and with the risk of explosion. Explosion-proof design can also be used in areas with a risk of explosion in coal mines or in zones 0, 1, 2 or the surface.

The SC-UAN-01 allows the values to be displayed on an LCD display with optional backlight. Alarm states are indicated by a local red LED. The supplied SCADA SW enables archiving and viewing of measured data and alarm states. The cable can be connected using a cable gland or connector.

Important note: Technical parameters of the SC-UAN may be changed. Please contact us for further technical advice and tailor-made solutions.
